OpenAIRE software corpus

Parallel selection by experimental context and GitHub availability

OpenAIRE software records

730,346

Zenodo record: 20428976

A · EXPERIMENTAL CONTEXT

Records with description text

412,221

software records

Mention “experiment” or “experiments” in the description

11,316

software records

B · GITHUB AVAILABILITY

Records with a repository field

568,255

software records

Valid GitHub links

553,703

links; 432,399 unique repositories

INTERSECTION · EXPERIMENT + GITHUB

3,876

valid GitHub links · 3,930 records with repository fields

After deduplication

3,211

unique GitHub repositories

VERIFIED REPOSITORY CONTAINMENT

Publication-associated repositories

386

supplied publication associations

Manually annotated benchmark

100

repositories

Remaining 286 repositories: additional repository analysis

Other 2,825 repositories complete the 3,211 corpus; publication-selection query not reconstructed.
